
Proceedings of the sixth Japanese-Australian workshop on Real and Complex Singularities

Edited by Toshizumi Fukui, Satoshi Koike and Laurentiu Paunescu

Preface

The sixth Japanese-Australian Workshop on Real and Complex Singularities (JARCS6) was held at Kagoshima University, Japan, during the period 23–27, November, 2015 (organizers: Laurentiu Paunescu, Adam Harris, Alex Isaev, Satoshi Koike, Kimio Miyajima, Shoji Yokura, Toshizumi Fukui). There were 40 participants, mostly from Japan and Australia. The workshop covered several topics in singularity theory, with deep relations with topology, algebraic geometry and differential geometry. We deeply appreciate Professor Osamu Saeki and Professor Shoji Yokura for their kind cooperation. The conference was supported by JSPS KAKENHI Grant Numbers JP30201510, JP26287011, JP15K04867, and Kagoshima University President Discretionary Expenses.

This volume contains several research papers including one survey. Each article in this volume has been peer refereed. We wish to express our appreciation to the authors who have contributed to this volume and the referees for their cooperation.

Toshizumi Fukui
Satoshi Koike
Laurentiu Paunescu

Contents

- From the blow-analytic equivalence to the arc-analytic equivalence: a survey
by Jean-Baptiste Campesato
- Local differential geometry of singular curves with finite multiplicities
by Toshizumi Fukui
- On the image of the associated form morphism
by Alex Isaev
- On blow-analytic equivalence of plane curves
by Masanori Kobayashi
- Comprehensive Gröbner systems approach to b -functions of μ -constant deformations
by Katsusuke Nabeshima and Shinichi Tajima
- A remark on metrically conical surface singularities of Brieskorn type
by Tomohiro Okuma
- Classical formulae on projective surfaces and 3-folds with ordinary singularities,
revisited
by Takahisa Sasajima and Toru Ohmoto
- The discriminant of Valentiner reflection group and deformations of a plane curve
by Jiro Sekiguchi
- Classification of quasihomogeneous polynomials of corank three with inner modality ≤ 14
by Masahiko Suzuki
